

# Amazing Animals Fact sheets

## Raptors

Raptors are identified as Birds of Prey that capture their food using their feet. They have three distinguishing features:

- large talons (or claws) used for hunting
- very keen eye sight to target prey
- sharp hooked beak for the tearing up of prey once caught

### Hobby Falcon

The Hobby Falcon is native to Australia. It is known for its speed and agility especially when it comes to hunting.

#### Habitat

The Hobby Falcon have a widespread habitat, found throughout all of mainland Australia and across northern and eastern Tasmania.

#### Diet

Catching prey includes large flying insects, small mammals, bats and even small birds up to their own body size.
